Listing of the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

CLAIMS:

1-17. (Canceled)

18. (Previously Presented) A method for generating and distributing personalized natural phenomena information comprising:

receiving natural phenomena data from a source;

receiving predetermined criteria for selecting natural phenomena data, wherein the predetermined criteria comprises information that describes personal preference data of a subscriber;

selecting a portion of the natural phenomena data based on the predetermined criteria; and

transmitting the portion to at least one destination device.

19. (Previously Presented) The method of claim 18, wherein receiving natural phenomena data occurs before receiving predetermined criteria for selecting natural phenomena data.

20. (Previously Presented) The method of claim 18, further comprising before transmitting, receiving predetermined criteria identifying at least one destination device, and where transmitting further comprises encoding the portion compliant to the destination device medium capabilities, features, and functions.

21. (Previously Presented) The method of claim 18, wherein the predetermined criteria further describes at least one activity and the predetermined activity further comprises:

at least one sensitivity to natural phenomena;

a schedule of the at least one activity; and

at least one geographic location of the at least one activity.

22. (Previously Presented) The method of claim 18, wherein the portion further comprises multimedia data.

23. (Previously Presented) The method of claim 18, wherein the destination device includes one or more devices selected from the group consisting of a telephone, a voicemail system, a pager, a multimedia-enabled computer, an email system, a computer display monitor, a personal digital assistant, and a personal communication system phone.

24-29. (Canceled)

30. (Previously Presented) A computerized system for generating and distributing personalized natural phenomena information, comprising:

a receiver of natural phenomena data;

a receiver of predetermined criteria for selection of natural phenomena data, wherein the predetermined criteria comprises personal preference data of a subscriber;

a selector of the portion of the natural phenomena data based on the predetermined criteria, communicatively connected to the receiver of natural phenomena data and the receiver of predetermined criteria; and

at least one transmitter communicatively connected between the selector and at least one destination device.

31. (Previously Presented) The computerized system of claim 30, further comprising a receiver of predetermined criteria of at least one destination device, communicatively coupled between the selector and the transmitter, and wherein the transmitter encodes the portion compliant to the capabilities, features, and functions of the destination device medium and transmits the encoded portion to the destination device.

32. (Previously Presented) The computerized system of claim 30, wherein the predetermined criteria further describes at least one activity and the predetermined activity further comprises:

at least one sensitivity to natural phenomena;

a schedule of the plurality of activities; and

at least one geographic location associated with each of the plurality of activities.

33. (Previously Presented) The computerized system of claim 30, wherein the portion further comprises multimedia data.

34. (Previously Presented) The computerized system of claim 30, wherein the destination device includes one or more devices selected from the group consisting of a telephone, a voicemail system, a pager, a multimedia-enabled computer, an email system, a computer display monitor, a personal digital assistant, and a personal communication system phone.

35-69. (Canceled)
